

Sustason® PPSU MG

PPSU

Our premium material especially for medical devices

Sustason® PPSU MG was specially developed for demanding applications in the healthcare industry. It is the ideal material for plastic components in the medical environment like trial implants due to its high heat and sterilisation resistance to common processes. Biocompatibility in accordance with ISO 10993-5 and/or USP Class VI directly on the semi-finished product guarantees maximum safety and compatibility with biological systems. It also impresses with its good chemical resistance and high impact strength.

Operating in the following industries

 Healthcare

Extended characteristics

Sterilisation resistance

Tested for hot steam (134°C, 10 minutes, 3.1 bar) up to 2,000 cycles (without additional cleaning). Other common sterilisation processes are also possible.

Biocompatibility

Tested and approved on the semi-finished product in accordance with ISO 10993-5 and USP Class VI (depending on colour). Further test series are available on request.

Very good chemical resistance

Resistant to alkalis, organic and inorganic solvents, even at high temperatures. It also has very good hydrolysis resistance.

Quality Management

The highest level of quality: Our MG products are subject to ISO 13485-certified process instructions. Change management including NOC is a basic requirement.

High mechanical strength

It retains its shape and property profile even when subjected to mechanical stresses and temperatures of up to 180°C.
