

Sustanat® Machine Grade Polycarbonate

Sustanat® Machine Grade Polycarbonate is a tough, semi-transparent material with outstanding strength, impact resistance, stiffness, and excellent electrical insulation properties. Often used for semiconductor machinery components, manifolds, machine guards, and more, **Sustanat®** is easy to fabricate and machine. Various sizes of sheet and rod are available from Roechling stock.

Sheet Stock

Rod Stock

Color

- 24" x 48" standard size
- Custom lengths available upon request
